PROFESSIONAL SUMMARY

Computer Science Engineering graduate (2026) with hands-on experience in **Python, C++, Flask, FastAPI, REST APIs, SQL, Git, and GitHub**. Strong foundation in **Data Structures & Algorithms, OOP, and DBMS**, with **450+ LeetCode problems solved**. Experienced in developing backend APIs and **Generative AI applications** using **Gemini API, Streamlit, Pydantic, and Prompt Engineering**. Seeking an entry-level **Software Engineer** role.

TECHNICAL SKILLS

Languages:	Python, C++, C, SQL
Backend & Databases:	Flask, FastAPI, REST APIs, CRUD Operations, JSON, MySQL, SQLite, Database Design, API Integration
AI / LLM:	Generative AI, LLMs, Gemini API, Prompt Engineering, Pydantic, Streamlit
Testing & Tools:	Postman, API Testing, Git, GitHub, VS Code, Debugging
CS Fundamentals:	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, SDLC, Agile

PROJECTS

AI-Powered Job Description Analyzer

🐙 [GitHub](#) | [Live Demo](#)

Python | Streamlit | Gemini API | Pydantic | Prompt Engineering

- Developed a **Generative AI application** using the **Gemini API** to analyze resumes against job descriptions and generate a **0–100 resume-to-job match score**.
- Engineered a structured LLM pipeline producing **6 validated output fields**: match score, matched skills, missing skills, ATS keywords, resume improvements, and role-specific interview questions.
- Implemented **Pydantic schema validation** and **Prompt Engineering** to standardize LLM responses across **5 recommendation categories** in a single analysis workflow.

Task Manager REST API

🐙 [GitHub](#)

Python | Flask | SQLite | REST APIs | Postman

- Engineered a **CRUD RESTful API** using **Flask** and **SQLite**, implementing **4 core operations**: task creation, retrieval, update, and deletion.
- Secured database operations using **parameterized SQL queries** across user-input queries, preventing SQL injection while adding structured input validation and error handling.
- Validated all **4 CRUD workflows** using **Postman**, covering successful requests, invalid inputs, error scenarios, and edge cases.

Food Ordering Web Application

Python | Flask | MySQL | HTML | CSS

- Developed a full-stack **Food Ordering Web Application** using **Python, Flask, and MySQL**, supporting **2 core workflows**: menu management and order processing.
- Integrated a **MySQL relational database** with the Flask backend to persist and manage data across both menu and ordering workflows.
- Connected **3 application layers**—frontend, Flask backend, and MySQL database—to enable retrieving and displaying application data from MySQL and end-to-end order processing.

ACHIEVEMENTS & CERTIFICATIONS

- Competitive Programming**: Secured **2nd place in ORION**, an inter-college competitive coding contest.
- Data Structures & Algorithms**: Solved **450+ technical problems on LeetCode**, strengthening algorithmic problem solving and optimization skills.
- NPTEL National Certification**: Data Structures & Algorithms — Problem Solving through C.
- Technical Certification**: Python Programming Certification — BYTS Services.

EDUCATION

B.E., Computer Science and Engineering

2026

Karpagam College of Engineering

CGPA: **7.5/10**
